East

- This section of Cedar Creek Road, between L A Dunham Road and I-95, has a range of commercial districts and uses. These commercial uses front along Cedar Creek Road with many residential areas behind them.
- The SF-6 zoning district for an initial zoning designation allows for a range of residential uses from single family (by right) to multi-family dwellings (subject to SUP approval).
- Denser residential developments, such as two-to-four family and multi-family dwellings, can serve as a buffer between the existing commercial and residential uses.
- The Future Land Use Plan Map designates the subject properties for Low Density Residential (LDR) and Office/Institutional (OI) development. The Future Land Use Plan text supports a careful blend of residential and office development.
- These properties are situated along a major corridor, adjacent to existing commercial zoning districts to the north and east.
- This item was heard by the Zoning Commission which recommended denial in a 4-1 vote. The applicant has appealed the decision to City Council.

The Professional Planning Staff recommends that the City Council move to APPROVE the initial map amendment to the zoning district (SF-6) rather than the Applicant request of MR-5 based on the following:

- The proposed initial zoning map amendment implements the policies adopted in the Future Land Use Plan (FLUP), and those policies found in the Unified Development Ordinance (UDO). The Future Land Use Plan designates the subject properties for Low Density Residential (LDR) and Office/Institutional (OI) development.
- These properties are situated along a major corridor, adjacent to existing commercial zoning districts to the north and east.
- The uses permitted by the proposed initial zoning district classification (SF-6) and standards apply to such uses are appropriate in the immediate area of the land to be zoned due to the existing city zoning and uses surrounding this property; and
- There are no other factors that will substantially affect public health, safety, morals, or general welfare that will not be properly addressed in subsequent reviews.

1. Approve of the initial zoning to the Single Family Residential 6 (SF-6) zoning district based on the evidence submitted and find that the map amendment would be consistent with the Future Land Use Plan and an amended consistency statement (recommended).
2. Approve of the initial zoning to MR-5 as presented based on the evidence submitted or established during the public hearing and determine a consistency and reasonableness statement.
3. Deny the map amendment request based on the evidence submitted and find that the map amendment is inconsistent with the Future Land Use Plan.
4. Table any action to allow for further investigation of the development.
