

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF FAYETTEVILLE AMENDING VARIOUS SECTIONS OF CHAPTER 17, OFFENSES AND MISCELANEOUS PROVISIONS PERTAINING TO EXCESSIVE AND UNNECESSARY NOISE, OF THE CODE OF ORDINANCES OF THE CITY OF FAYETTEVILLE, NORTH CAROLINA

BE IT ORDAINED, by the City Council of the City of Fayetteville, North Carolina, that:

Section 1. Sections 17-7 through 17-18 are amended by deleting the same in their entirety and substituting the following therefor:

Sec. 17-7. Purpose for Regulating Excessive and Unnecessary Noise.

- a. It is recognized that excessive and unnecessary noise endangers the physical and emotional health and welfare of the people, interferes with legitimate business and recreational activity, increases construction costs, depresses property values, offends the senses, creates public nuisances, and in other respects reduces the quality of life.
- b. It is further recognized that because the regulation of excessive and unnecessary noise that may jeopardize human health or welfare or substantially degrade the quality of life is well within the purview of the governing body's police powers, it is declared to be the purposes of this section to prevent, prohibit, and provide for the regulation and abatement of excessive and unnecessary noise which may injure the physical and emotional health or welfare of its citizens or degrade the quality of life.
- c. It is further recognized that there are many sources of excessive and unnecessary noise, which can and is often generated when no city official or law enforcement officer is present and able to take enforcement action. It is therefore declared to be the purpose of this section to create a private cause of action for enforcement of sections 17-7 through 17-18 as set forth in section 17-17.

State law reference—Noise regulation, G.S. 160A-184.

Sec. 17-8. Certain Noises and Sounds Prohibited.

It shall be unlawful, except as expressly permitted in this chapter, to make, cause, or allow the making of any noise or sound which exceeds the limits set forth in sections 17-9 through 17-16.

Sec. 17-9. Definitions.

Ambient Sound means the total noise in a given environment.

Classification of Use Occupancies. For the purpose of defining the "use occupancy" all premises containing habitually occupied sleeping quarters shall be considered in residential use.

All premises containing transient commercial sleeping quarters shall be considered tourist use. All premises containing businesses where sales, professional, or other commercial use is legally permitted shall be considered commercial use. All premises where manufacturing is legally permitted shall be considered manufacturing use. In case of multiple use, the more restrictive use category shall prevail. Hospitals, nursing homes, schools, libraries, and church uses shall be considered residential uses. Any area not otherwise classified shall conform to commercial standards.

Decibel (dB) means a standard unit for describing the amplitude of sound, equal to 20 times the logarithm to the base 10 of the ratio of the pressure of the sound measured to the reference pressure, which is 20 micronewtons per square meter.

Emergency Work means any work performed for the purposes of preventing or alleviating physical trauma or property damage threatened or caused by an existing or imminent peril.

Sound Level Measurement Device means any device designed by the manufacturer to measure audible sound levels in dB. Failure to maintain or calibrate the device in accordance with manufacturer specifications shall not require exclusion of the reading at any hearing or trial for a violation of this section, but may be considered by the finder of fact in determining whether sections 17-7 through 17-18 has been violated.

Weekend means that period of time between 12:00 midnight on Friday to 12:00 midnight on Sunday.

Sec. 17-10. Maximum Permissible Sound Levels by Use Occupancy.

No person shall operate or cause to be operated any source of sound:

1. From any occupancy in such a manner as to create a sound level audible, at a distance from the boundary of the property, greater than the limits set forth in Table 1 below; or
2. Which exceeds the limits set forth for the use occupancy category in Table 1 below for more than five minutes, to be measured at or beyond the property boundary of the land use from which the sound emanates.
